M-Files

# M-FILES DESKTOP UI REFRESH INSTRUCTIONS TO ACCESS PREVIEW

LAST UPDATED SEPTEMBER 2022

1. There are two installation packages available:
    a. Preview20220927.zip (for client only installation)
    b. Preview20220927_Full_Install.zip (for full M-Files installation)

2. The installation package contains the M-Files setup file (.msi file) for installing the M-Files software, and two scripts (NewDesktop.bat & DefaultDesktop.bat) for changing between the new and old client UI. Please note that using the script requires admin rights in your computer.

3. Open the M-Files setup file to install the M-Files client.
    a. For client installation instructions, please refer to: https://www.m-files.com/user-guide/2018/eng/Installing_the_software.html

4. In order to switch to the new Desktop UI, run NewDesktop.bat by double-clicking the file.
    a. All M-Files windows are closed in the process, so please ensure all M-Files changes have been saved before continuing.
    b. Follow the instructions in the program to change your client to the new UI.

5. Reopen the M-Files client.

6. To switch back to the old Desktop UI, run DefaultDesktop.bat by double-clicking the file. Follow the instructions in the program to change your client back to the old UI. Reopen the client.
